# DAVsky

CalDAV and CardDAV sync for Android

FACT SHEET

DAVsky keeps the calendars, contacts and tasks on an Android device in sync with a CalDAV or CardDAV server of the user's choice, such as Nextcloud, mailbox.org, Posteo, Fastmail, SOGo, Baïkal, Radicale or iCloud. It also subscribes to ICS and webcal calendars such as public holidays or school terms. Data travels directly between the device and the server; DAVsky puts no service of its own in between.

|---|---|
| **Name** | DAVsky |
| **Publisher** | RYPOX GmbH |
| **Contact** | support@rypox.com |
| **Website** | www.rypox.com/davsky |
| **Google Play** | play.google.com/store/apps/details?id=com.rypox.davsky |
| **Video** | YouTube: youtube.com/watch?v=yt8W_aQosWc (about 30 s, English) |
| **Platform** | Android 8.0 or later |
| **Languages** | 18: English, Catalan, Czech, Danish, Dutch, Finnish, French, German, Greek, Hungarian, Italian, Norwegian, Polish, Portuguese, Romanian, Spanish, Swedish, Ukrainian |
| **Price** | Free to download, all features for 14 days. After that, syncing at the tap of a button stays available; automatic background sync requires DAVsky Pro, a one-time in-app purchase, no subscription (euro area: €4.99). |

## FEATURES

- Two-way sync of calendars (CalDAV), contacts (CardDAV) and tasks
- Subscriptions to ICS and webcal feeds, by link or as an .ics file
- Several accounts side by side, each as a card with its last and next sync
- Guided setup for many providers; otherwise the server address is enough
- Every calendar and address book can be switched on or off on its own
- Sync log per calendar and address book: what was fetched and what was uploaded
- Clear notices on the account when a sync fails or background sync stops running
- Sync interval per type, quiet hours, Wi-Fi only
- Widget and launcher shortcut: sync all accounts with one tap
- Contacts stored only on the device can be moved into an address book
- Export as .ics and .vcf; self-signed certificates with a visible fingerprint

**Images and texts may be used freely for reporting on DAVsky.**

## PRIVACY

No ads, no data shared with third parties. Calendar, contact and task content is processed on the device and exchanged only with the chosen server. A pseudonymous usage signal (random ID, app and Android version, device model, kind of server; no content and no addresses) goes to a service run by RYPOX GmbH; it can be switched off in the settings. Purchases are handled by Google Play.

## GOOD TO KNOW

- Tasks need a task app such as OpenTasks or Tasks.org; Android has no built-in storage for them.
- DAVsky speaks CalDAV, CardDAV and ICS. Exchange (ActiveSync, EWS) and WebDAV file storage are not covered.
- Without Pro, DAVsky syncs only at the tap of a button after the trial; no data is removed.
- Android only; there is no iOS or desktop version.
